

# How Dealerships Are Using Hands Free Activation To Boost Profits During COVID 19.

Studies show that nearly 80% of the germs that are spread are done so via the hands. Many customers may no longer feel safe or comfortable entering or exiting a showroom or service department if they have to grab a frequently touched surface such as a door handle. Car dealerships will need to consider major changes to help reassure. One solution can be an automated touchless entry system. The record 8100 swing operator is the ideal solution and most inexpensive way to retrofit any manually operated door. This technology incorporates motion sensors that signal the door to open. Each unit comes with a 2-year warranty, is rated for over **1 million cycles**, and is installed by an AAADMS certified technician.

If you would like an estimate or desire further consultation, please contact Toby Holtz at American Door and Dock at (847) 815-5916 or by email at [tholtz@americandooranddock.com](mailto:tholtz@americandooranddock.com).

## NOW INTRODUCING THE FUTURE... HANDS-FREE DOOR ACTIVATION

Contact **American Door and Dock** for more details on how you can go **hands-free** and reduce the spread of germs on the most frequently touched surfaces.
